“The human DNA is a *biological Internet* and superior in many aspects to the artificial one. The latest **Russian scientific research** directly or indirectly explains phenomena such as *clairvoyance, intuition, spontaneous and remote acts of healing, self healing, affirmation techniques, unusual light/ auras* around people The mind’s influence on weather patterns and much more.”

In addition, there is evidence for a whole new type of medicine in which DNA can be influenced and reprogrammed by words and frequencies...

In humans, hyper-communication is most often encountered when one suddenly gains **access** to information that is outside one's knowledge base. Such hyper-communication is then experienced as inspiration or intuition (**also in trance channeling**).

Since the basic structure of DNA-alkaline pairs and of language is of the same structure, no DNA decoding is necessary. One can simply use words and sentences of the human language! This, too, was **experimentally proven!**”
